This book is dedicated to helping potters identify quickly the nature, causes and remedies of a multitude of difficulties that can arise during pottery production. Comprehensive and easy to use, it has already proved itself to be an

enormously helpful source of reference for craft potters and those working in the ceramic industry. The second edition has been fully redesigned with colour illustrations and the text has been revised, updated and expanded to reflect new developments.

About the Author Harry Fraser has been responsible for the craft ceramic activities of several leading companies and is the former managing director of Potclays, one the UK's largest pottery suppliers.
