It was good 19 years ago....By A CustomerChina mending has changed since Echo Evetts wrote this fine book. There is still some useful information but not much. Porcelain repair products are much more varied and widely available today. Epoxies, lacquers, enamels and an airbrush are still the staple, but the names, brands and sources keep changing. Evetts however deserves credit for writing a book that gives more information than most, even though much is obsolete (not Evetts fault). Most repair books are either incomplete (they don't want to tell too much), or obsolete. Some of the recent literature is simply in error. Allan Koskela, restorer.

156 pages of mending, repairing and restoring china with examples of how to repair different articles such as adding a cup handle, a plate, a teapot, vases, centerpieces, earthenware, applying adhesive, rubber molds, modelling an arm, mixing pigments, pencilling in a repeated pattern, choosing the right brush other tools and cutting gold leaf. There are

illustrations and pictures to help with descriptions.
