**Trish Phillips, Ann Montanaro : How To Make Pop-Up Cards: 55 practical projects including step-by-step folds** before purchasing it in order to gage whether or not it would be worth my time, and all praised How To Make Pop-Up Cards: 55 practical projects including step-by-step folds:

9 of 9 people found the following review helpful. If I was an artist, I wouldn't NEED this book!By CustomerTo begin with..they say "draw" this, (item on the card). Paying this much for a how to book and not even giving you the images to trace out is extremely poor. I admit it, I can't draw my way out of a box. I can't just draw a dragon or a dog or ? so this book is totally useless to me. If I could give it zero stars, I would.The cover of the book is totally deceiving saying that it can be used by beginners and pictures to help you through every stage. Just not true. I wish I could get a refund.0 of 0 people found the following review helpful. Five StarsBy Sally M. GrahamThis book is great! easy to

understand.4 of 5 people found the following review helpful. A giftBy emmaBought this for someone and he loves it! He's been making pop up cards for everyone! He says this a good book although he mentioned that with some of the steps it misses out some things and he has to tweak measurements to get it right but apart from that he loves the book.

Home-made greetings cards are satisfying to make and wonderful to receive. This book shows you how to use paper-engineering skills to create movable and pop-up cards that will delight the lucky recipients. With 500 stunning photographs.

About the AuthorTrish Phillips is an author, illustrator and paper engineer. She studied Graphic Design at Camberwell College of Art in London, and her interest in paper engineering was inspired by tutor Paul Jackson, a famous origamist and paper sculptor. Ann Montanaro is an avid pop-up book collector, author and researcher. She is the founder of The Movable Book Society, a world-wide organization, which has been promoting pop-up books since 1993.
