Simple Toys you can makeBy HS LimIt always pain me to see simple origami models being discarded in favour of the complex ones.As far as I am concern, if you are really an expert in origami, you need not prove it by folding complex models but prove it by really appreciating the simple ones!I am a fan of Paul Jackson's works.In this book, models include twirly copter, tumbler, double vision, waterbomb, jumping frog, jaws, propeller, whip-crack and flapping bird (not the traditional one).This book makes a good present for the younger ones and to introduce them to origami. With some help from a parent, and some bonding time, this will definitely raise a smile.I too have enjoyed folding it and teaching it.

Incredible Action Origami contains nine colorful, movable origami designs kids can learn to make, such as a jumping

frog, a helicopter, and a flapping bird. Includes easy, step-by-step diagrams and helpful instructions as well as more than 80 bright stickers kids can use to customize their designs. With just paper, scissors, tape, and a felt-tip pen, kids can turn these designs into movable origami that will impress their friends and family.
