Maruscha Gaasenbeek, Tine Beauveser : Iris Folding With Paper (Crafts Special) before purchasing it in order to gage whether or not it would be worth my time, and all praised Iris Folding With Paper (Crafts Special):

0 of 0 people found the following review helpful. No Paper?By DoinWhatComesNaturallyFrom the title, preface, and description on the back of the book it sounds like this book was supposed to be packaged with papers. (From the preface: In the last year, we have often been asked for more attractive paper. We have now found this paper, and this book, Iris Folding with Papers, shows you what you can do with it using both existing and new patterns.")I am new to paper folding, and was quite disappointed not to get at least a starter pack of paper. So, now where do we get "this" paper? I love the patterns, I am just disappointed that I now have to dig up paper before I begin. . .0 of 0 people found the following review helpful. Interesting take on paper folding. Lovely!By Julia M. JohnsonI love my new book.0 of 0 people found the following review helpful. Great Iris folding bookBy MagesseThis is a very good book about Iris Folding. Thye use the European method of using folded strips of paper in their designs, but they can also be done the American way of using unfolded strips which makes the designed images much thinner and easier to mail. Style not

withstanding, these are beautiful designs and not that hard. I highly recommend this book.

Iris folding using envelopes has become incredibly popular. This is the fifth book by Maruscha and Tine and is based on using Iris folding paper. Since it appears that not everybody can save enough envelopes they have decided to use this alternative paper. The results are excellent. You can get started straight away with the many new ideas.
