Very Pretty; but more for crafts than giftwrapBy gailThese are very pretty; but not really very practical for anything but small gifts. They come in a booklet that has serrated edges and you tear them out and unfold them. I used them for my daughters birthday gifts and they were lovely; but I am giving the rest to her for her origami and crafts and I will buy larger paper for gifts3 of 3 people found the following review helpful. Classy paperBy teslabuilderThe patterns are classy, a big step above what you can get at a department store. Have used them

to wrap 2 baby shower gifts and both times my gift was the first to be opened. If the sheets were bigger you would get 5 stars
