Faulks I have her first book and I have made several things by her so this book was on my wish list to get! Oh dear! I wish I could be more positive but for me this book is a let down. I love her scarves and the arm warmers. The socks look like fun BUT the skirt is not a quick project surely? The shrug is not attractive - maybe the colour used? The travel shawl is difficult to see because of the colour used. And some of the things - the tea cosy, the headband and the bookmark???

By Kathy Maybe it's just that I'm not the best knitter, but I only see one or two projects in this book that I'd be able to do "on the go". Almost all of them are lace, cables or stranded and when I do any of those, I need to give it my full attention and it doesn't go fast for me. But, the projects are mostly all small, which would make them easy to take with you. And, they are very nice patterns - things I haven't seen in

other knitting books. There's a really unique little lace wristlet bag that closes by slipping one handle over the other that I definitely want to make. There is a really nice cabled headband that closes with two buttons that I also want to make. There are 3 pairs of stranded mittens, gloves and handwarmers that are really nice. There are a few socks, which I could do without because I definitely have more than enough sock patterns, but they are nice. There are a couple lace scarf patterns which I also don't need anymore of. But, again they are nice patterns. There are a couple of sweater patterns and a v-neck vest pattern with two buttons at the top that looks really nice. There's a slipper pattern that can be felted or left plain that's really cute. There are also a couple of hat patterns, including a really nice cabled beret. So, if you are looking for a book of nice accessories, you'll really like this book. The photography is beautiful. I can't say anything about the instructions because I tend to buy knitting books before I actually need them and it will probably be awhile before I get to any of the patterns. Just don't be fooled by the title! The only part of the book that refers to knitting "around the clock" are a few pages that list times you can knit, such as "while waiting at the doctor's office", "while your family is sleeping in", etc. No revelations there. And, again - I don't see these as patterns that you'd want to take with you unless you are really experienced.

Women who love to knit are determined to find time to practice their craft, despite the many roles they fulfill throughout the day. They knit while traveling or commuting, while waiting for their kids, while socializing. Times like these call for projects that are easily transportable and have stitch patterns that are simple to memorize. Vronik Avery has created 30 such projects for *Knitting 24/7*, a collection of stylish clothing and accessories that make use of those in-between times when we're busy, yet our hands are free. Ranging from sweaters, scarves, and shrugs to hats and mitts, the projects represent both what women want to wear and what they actually have time to knit. The book's gorgeous color photographs capture women in a range of settings: a morning at work, a dinner with friends, a relaxing weekend afternoon evoking the time of day when each wardrobe item might be worn.
