By Nora Sline
Nice short bios of well-known metalsmiths with an in-depth description of how they constructed a signature piece. You need a good grounding in basic metalsmithing to be able to follow and make use of the instructions, so don't buy this after a weekend workshop expecting to copy their processes. It may inspire you to learn more!

Great book
By John R Anderson
I checked this out from the library and decided I need my own copy. This will be a great addition to my collection.

It came as promised in excellent condition.

Craft an incredible assortment of fine jewelry--each a designer original. The impressive "gems" from innovative, contemporary artisans are as magnificent as anything displayed in a gallery, but aren't meant to languish in a case.

Engraving, casting, fabricating, forging, soldering, and enameling--the techniques are varied and creative, just like the projects. Pins, earrings, rings, a necklace, a pendant, a bangle, and a cuff bracelet of extraordinary beauty and style make exceptional accessories that elevate any outfit. Finally, the sky's the limit when it comes to your own designs--draw inspiration from fascinating profiles of the artists and their careers, as well as close-up color photographs of additional pieces from their collections. Compiled by an international award-winning jewelry maker, these outstanding examples will fill you with a passion for working with precious metals. The author lives in San Francisco, CA. 144 pages (all in color), 8 1/2 x 10. NEW IN PAPERBACK

From Library Journal Artist and teacher Revere (Professional Goldsmithing) presents contemporary jewelry projects by 25 fellow artists in this book, which is intended for advanced gold and silver workers. Step-by-step instructions are included, but these stylish pieces are so distinctive that it is hard to imagine anyone copying them exactly. This book may have greatest value for the interesting biographical sketches of the artists and the insights into their working techniques provided by the projects. Recommended for decorative arts collections. Copyright 2000 Reed Business Information, Inc.
