Miyuki Yoshida : The Art of Paper Folding for Pop-Up before purchasing it in order to gage whether or not it would be worth my time, and all praised The Art of Paper Folding for Pop-Up:

0 of 0 people found the following review helpful. Who Is This For?By MattBFor beginners, the complete lack of any text at all will be an impediment to learning how to make these popups themselves. More advanced popup creators will find no new or unusual techniques here. Instead, this a combination of some interesting iterations on simple and familiar techniques, some lame ones, some that don't work, and some that are repetitive. The usefulness of this book is marginal at best -- only those who want to own every book there is about popups will need it.0 of 0 people found the following review helpful. New trick! The floating piece...By Randall LaueFound a new insight into the world of paper engineering.2 of 2 people found the following review helpful. Refined pop-up book/cardsBy S.PThe pop-ups in this book have are minimalistic and very poetic. The fact that they are geometric and abstract stimulates the imagination.Also, each pop-up can be removed and used as a card or decoration.

This is more than a book. Thirty pop-up sheets held together by two screws which not only hold the book together in a visually unique package but are also easily removable, offer a feast of useful pop-ups that can be used as greeting cards, hangings, decorations, or whatever your heart desires. Miyuki Yoshida, a professional paper engineer, created thirty sheets in a way that allows people to find their own way of enjoying the book. Each pop-up sheet is intricately designed using simple colors. The delicate paper-cutting and folding work changes its appearance depending on the angle from which it is seen. "You will see how a sheet of paper turns into a piece of artwork," Yoshida comments. The Art of Paper-Folding for Pop-up also offers a growing number of paper-craft enthusiasts a font of inspiring folding and cutting ideas.

About the AuthorMiyuki Yoshida, a paper engineer and package designer, has won awards for her works, which

explore the beauty of paper structures.
